Topic: Petition management system

Case Study 14: Petition Management System:

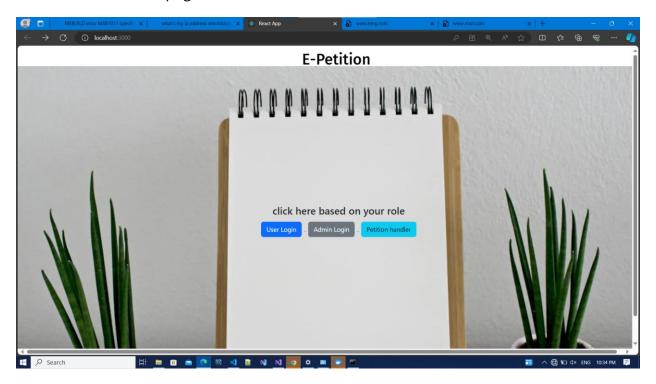

The Petition Management System is to streamline the petitions process. The software dramatically reduces

processing time by digitally imaging petitions as well as automatically 'marking' the page with a time stamp

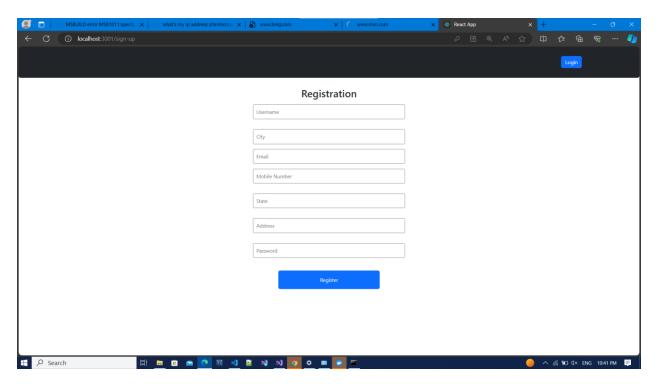

or sequence number. Most importantly, the system improves transparency through technology making

public documents available quickly

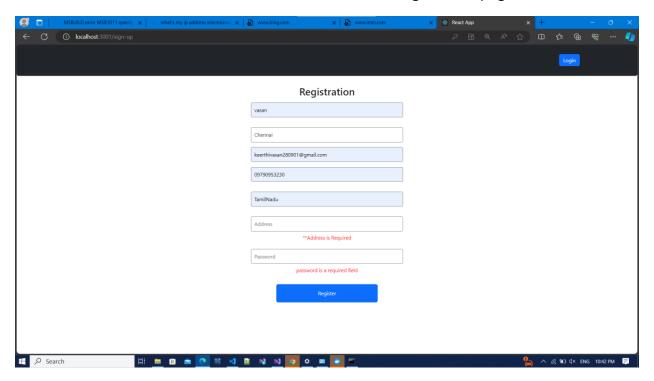

1. Role selection page

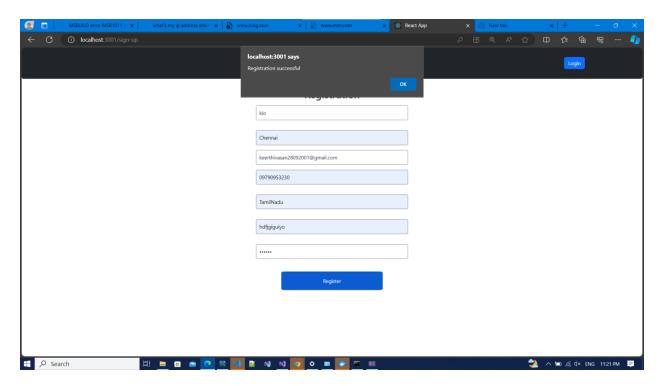

2. Registration page for the users

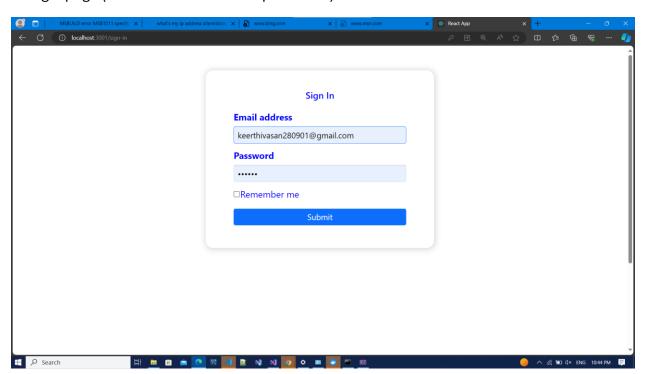

3. Validations for mobile number and email are done in registration page

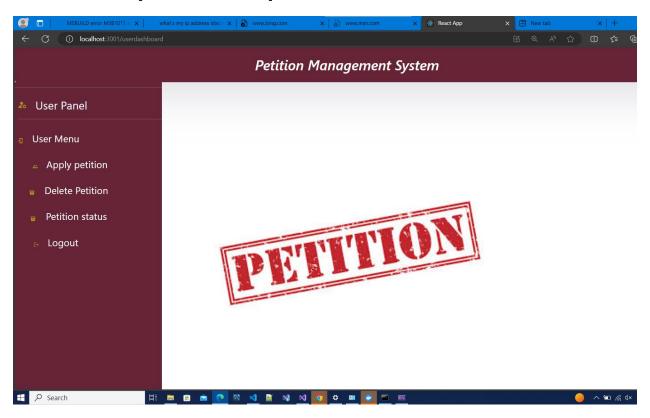

4. Registration successful message

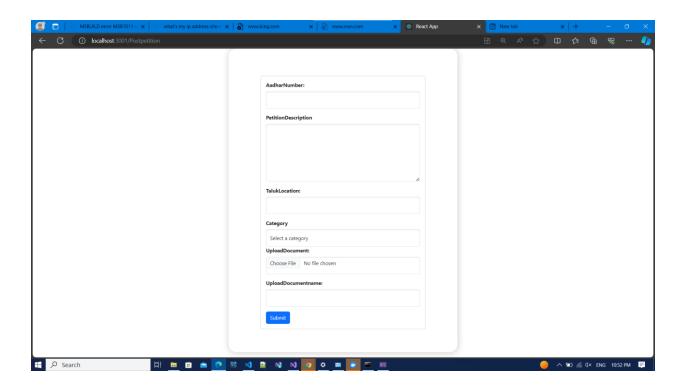

5.Login page (with valid email id and password)

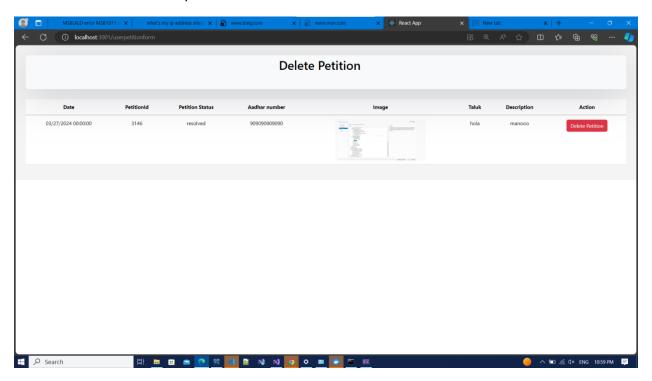

6. USER MODULE [User's dashboard]

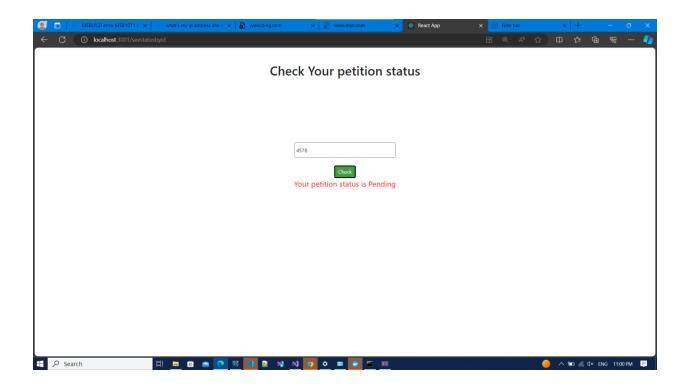

7. user action 1- Apply petition

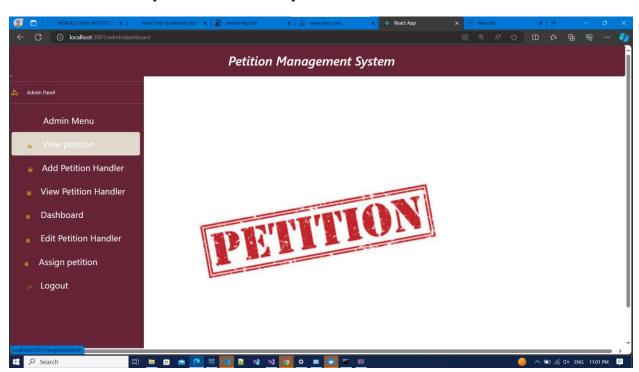

8. User action 2 – Delete petition

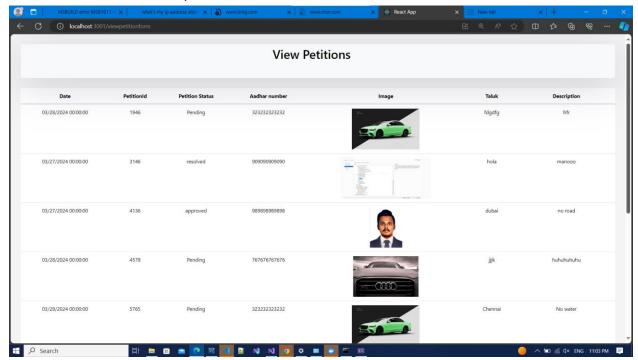

9. User action 3 - Check the petition status

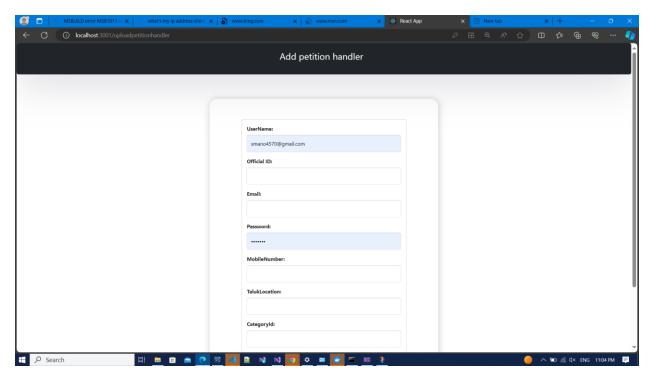

10. ADMIN MODULE [admin's dashboard]

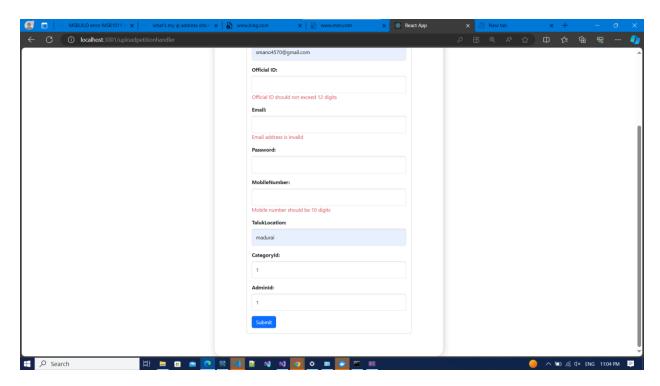

11. Admin action 1 - view petitions

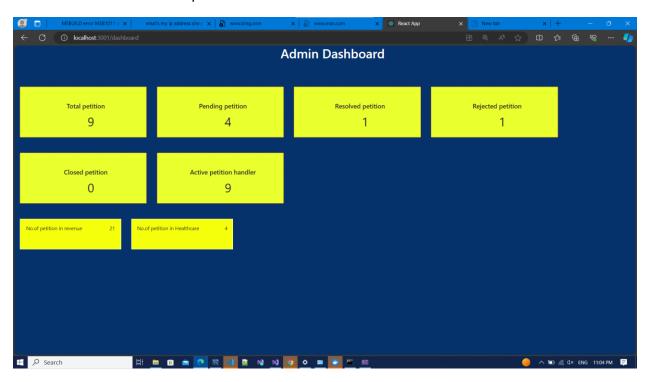

12. Admin action-2 Add petition handler

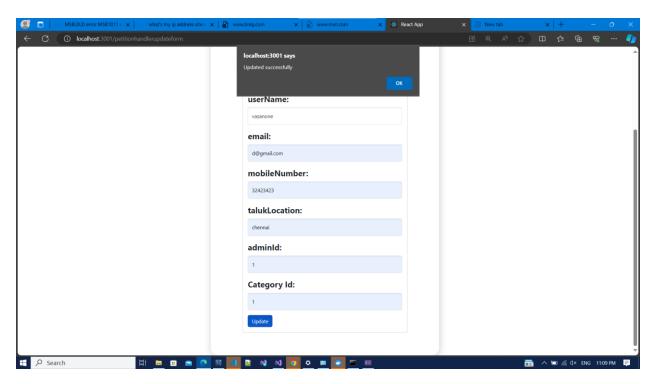

13. Validations for adding petition handler

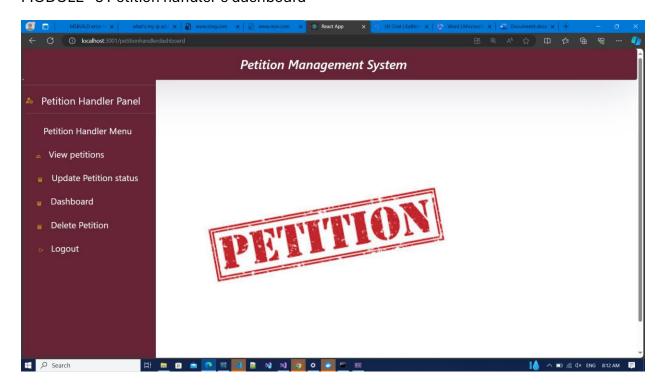

14. Petition Status and Department status

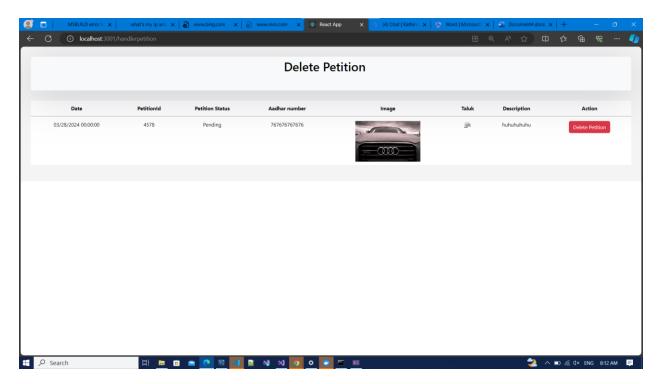

15. Updating petition handler

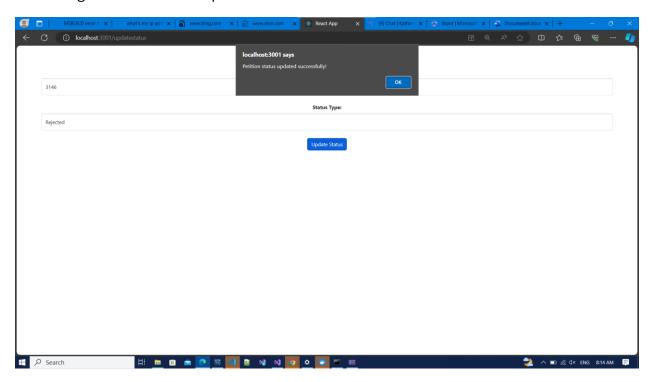

MODULE -3 Petition handler's dashboard

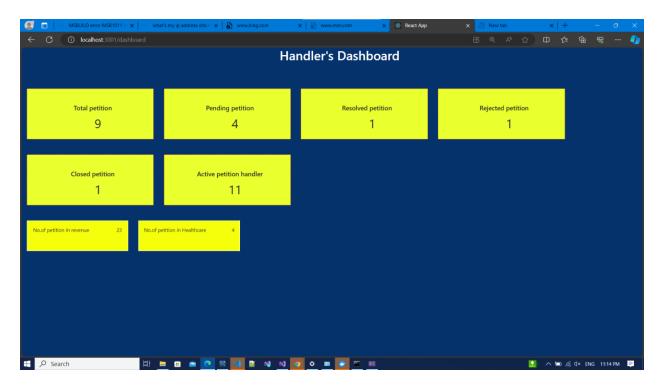

16. Delete the petitions:

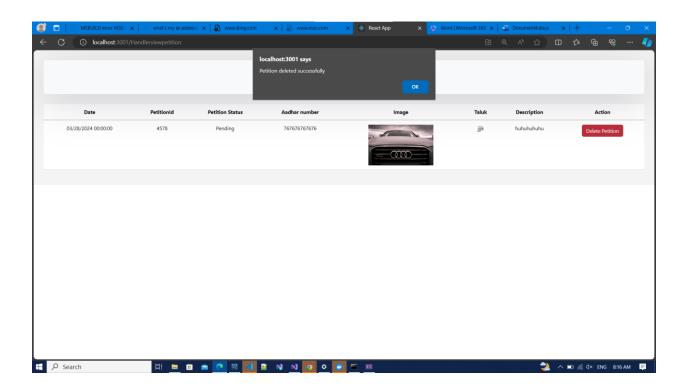

17. Change the status of the petition

18: Petition handler's dashboard

19. Petitions are deleted successfully
